

Pansies withstand cold temperatures for certain times and therefore, here in Europe they are true spring plants blooming at the same time as daffodils, primrose's and tulips.

Welcome to our newsletter, where we will be keeping you up to date with any new services or products that JM-Properties will be able to offer you or your business. Since our last news letter we have been very busy as the growing season has officially kicked off! So everything in your garden should be growing by now, but is it looking its best?

So within this newsletter we have provided some helpful garden tips to keep you busy during April and May.

Firstly don't be put off with the amount of work your garden may require at this time of the year, for example weeding, pruning, mulching and of course the cutting of grass and hedges. It will soon full in to place.

Pruning

You should start to see new growth and new shoots on all shrubs, if you were unable to prune any perennials last autumn, this is really the time to do so. For example if you have the butterfly plant (Buddleia) in your garden you can cut this back really hard if there are signs of new green shoots. Clematis's will also need pruning after they have finished blooming; this will make them bloom stronger next year.

For all those Vegetable lovers

Carrots, Cabbage, Rhubarb, Spinach, and Cauliflower all like to be planted this time of year as they enjoy the crisp mornings.

Lawns

Lawns will need some attention including cutting, keeping clear of all debris i.e. leaves, sticks etc, you could also apply a fertilizer to kill any unwanted weeds and moss.

Flower beds

Keep them clear of weeds etc by turning over the soil and keeping them cultivated or you could decide to lay a nice thick layer of chip bark or woodland mulch down this keeps them looking smart and weed free.

Hope you find these tips helpful

If you would like to know more details about any of our services please don't hesitate to contact us or visit us at www.jm-properties.co.uk

Thank you

James moore
